

Fatiya Quzza

Software Engineer | Full-Stack Developer

📍 Banda Aceh, Indonesia | ✉️ fatiyaquzzaaa@gmail.com | [in fatiya-quzza](https://www.linkedin.com/in/fatiya-quzza) | [github fatiyaquzza](https://github.com/fatiyaquzza)

Summary

Fresh graduate in Informatics from Universitas Syiah Kuala (GPA 3.88/4.0) with hands-on experience building web and mobile applications across full-stack technologies. Proven ability to deliver end-to-end software solutions independently—including a thesis-level mobile and web system (*QFlora*)—as well as in collaborative team environments. Completed an international exchange semester at Universiti Teknologi Malaysia and a structured AI/ML learning program (Bangkit Academy 2024). Eager to contribute technical skills and a growth mindset to BUMN's digital transformation initiatives.

Education

Universitas Syiah Kuala	2021 – 2025
• Bachelor's Degree in Informatics GPA: 3.88 / 4.0	
Universiti Teknologi Malaysia	Sep 2024 – Feb 2025
• Exchange Student — International Credit Transfer Program	
• Faculty of Computing, Bioinformatics (1 semester)	
SMA Negeri Modal Bangsa	2018 – 2021
• Mathematics and Natural Sciences	

Experience

Kumon Teaching Assistant — EFL	Aug 2025 – Present
• Instructed children from kindergarten through senior high school in the Kumon English as a Foreign Language (EFL) program, focusing on advanced reading comprehension, listening skills, and vocabulary expansion.	
• Delivered structured daily worksheet and audio-based learning to foster learner independence and self-paced academic progress.	
• Monitored student progress across multiple age groups, adapting instructional approaches to individual learning needs.	
LKBH Sata Al-Faqih Full-Stack Developer Intern	Jul – Aug 2024
• Built a public-facing informational website for a legal aid organization using ReactJS, Express.js, and MySQL.	
• Designed dynamic pages covering legal services, team profiles, news/articles, and contact information.	
• Ensured fully responsive design with cross-device compatibility and intuitive navigation.	
Bangkit Academy 2024 by Google, GoTo, Tokopedia, Traveloka	Feb – Jun 2024
Independent Study — Android Learning Path (Kampus Merdeka)	
• Completed structured Android development modules via Dicoding Academy, covering UI design, app architecture, and REST API integration.	
• Delivered DermoAlly as capstone project — a Kotlin-based Android app for early skin disease detection using on-device image classification.	
• Engaged in regular mentor consultations for professional and technical guidance throughout the cohort.	
Google Developer Student Clubs (GDSC) — Universitas Syiah Kuala	Oct 2023 – Oct 2024
Project Management Staff	
• Planned and executed technical events and workshops, aligning each initiative with club goals and timelines.	
• Managed logistics including venue, scheduling, and resource allocation to optimize participant experience.	
• Facilitated knowledge-sharing sessions contributing to the technical skill development of club members.	
Informatics Student Association (HMIF) — Universitas Syiah Kuala	Feb 2024 – Jan 2025
Secretary, Student Welfare Department	
• Managed administrative operations including meeting minutes, official correspondence, and internal documentation.	

- Coordinated logistical support and communication flow for all departmental activities and initiatives.

Administrative Division Staff

Feb 2023 – Jan 2024

- Drafted official correspondence and managed HMIF's Instagram account to promote programs and merchandise.
- Served as event secretary across multiple HMIF projects, coordinating logistics and documentation.

Universitas Syiah Kuala | *Laboratory Assistant — Numerical Computing*

Aug – Dec 2023

- Guided 80 students across two lab sections through 12 sessions of numerical computing coursework.
- Oversaw assignments, projects, and assessments; provided targeted re-learning support for students who needed additional help.

Projects

QFlora — Undergraduate Thesis Project

2025

Mobile app + Web admin dashboard · Mandiri (Independent)

- Independently designed and built a full-stack system: a React Native mobile app for exploring Quranic plants with authenticated favourites and Quranic verse audio playback, plus a ReactJS + Express.js web admin dashboard for managing plant taxonomy data.
- Implemented user authentication, real-time Firebase database, and audio streaming within a single cohesive architecture.
- **Stack:** React Native, Expo, Firebase, Express.js, ReactJS

Alzheimer's Disease Classification Website

2025

Group project — Universiti Teknologi Malaysia

- Built an interactive web app to classify Alzheimer's disease stages from MRI scans using pretrained EfficientNet-B0 and ResNet50 deep learning models.
- **Stack:** Python, Streamlit, TensorFlow **Live:** alzheimerclassification.streamlit.app

DermoAlly

2024

Capstone project — Bangkit Academy 2024

- Developed an Android mobile app for early skin disease detection using on-device image classification.
- **Stack:** Kotlin, Android Studio, TensorFlow Lite

LKBH Sata Al-Faqih Website

2024

Internship deliverable

- Developed a fully responsive informational website with legal services overview, team profiles, news/articles, and contact page.
- **Stack:** ReactJS, Express.js, MySQL, Tailwind CSS

Wedding Invitation Web App

2024

Client project

- Built a responsive wedding invitation website to share event details, RSVP, and live updates with guests.
- **Stack:** Laravel, Tailwind CSS

Forterzzz — Team Portfolio Website

2024

Team project

- Developed an interactive and responsive team portfolio website with dynamic content and modern UI.
- **Stack:** React.js, Tailwind CSS

Informatics Final Assignment Portfolio

2023

Academic project

- Built a web-based archive system for Informatics students to showcase final assignment projects, filterable by specialization track.
- **Stack:** Laravel, Tailwind CSS

TrashPorter

2023

Academic project

- Designed a web platform to improve waste management services in Indonesia, enabling users to request pickups and track service status.
- **Stack:** Laravel, Tailwind CSS

Skills & Technologies

Languages: Bahasa Indonesia (Native) English (Professional)

Programming Languages: C, Java, JavaScript, TypeScript, Kotlin, Python, SQL

Frontend: ReactJS, React Native, Expo, Tailwind CSS

Backend & Database: Node.js, Express.js, Laravel, AdonisJS, MySQL, Firebase

ML / Data: TensorFlow, Streamlit, Python

Tools: Microsoft Office Suite (Word, Excel, PowerPoint), Google Workspace (Docs, Sheets, Slides), Canva, Figma, Git, draw.io
